Weekly Report Highlights

Congress

- ~~Senator Glenn will attempt to attach his legislation authorizing GAO audits of the Agency as an amendment to another bill being considered by the Senate, probably the Boren-Cohen oversight legislation, which is due to be considered by the full Senate in the next few weeks.~~
- The Senate Labor and Human Resources Committee voted last week to favorably report to the full Senate legislation to ban preemployment use of the polygraph in the private sector and circumscribe its use otherwise. Various governmental exemptions, including those for the Agency, remain in the bill. The timing and results of Senate floor action remain uncertain.

25X1

- The State Department used a recent NIC paper on Mexico as the basis for a briefing paper for President Reagan to use in the upcoming summit with President de la Madrid.
- The NIO for Counterterrorism met with Intelligence Community representatives to prepare an assessment for Assistant Secretary of State Murphy on the Abu Nidal Organization and its relationship with Syria, and a warning memorandum on indications of renewed Libyan terrorism against US and French interests.
- The NIO for Nuclear Proliferation is meeting with a [redacted] team [redacted] to review the Department of Energy's intelligence programs.

25X1
25X1

Administrative

- In response to a request from the Senate Select Committee on Intelligence, the IG has initiated an inspection of policies and practices within the Agency with respect to the acquisition of computers. The principal issue raised by the SSCI concerns the relative cost of purchasing large computers versus leasing. The inspection should also provide information that will be useful in discussions of the Agency's FY 1989 budget.
- Office of Security (OS), National Security Agency (NSA), and Secret Service officers are conducting a joint evaluation of White House, National Security Council and Office of Management and Budget computer systems. The White House Chief of Staff requested reaccreditation of these systems that process CIA and NSA information.
- On 27 January, the Office of Personnel (OP) initiated an automated Insurance Claims, Accounting Reporting, and Enrollments (ICARE) system for processing health insurance claims. Last year OP manually processed a staggering 121,000 health insurance claims, 26 percent more than 1986 and 78 percent more than 1985. The new system should help speed the processing of claims, which had become a sore-point with employees.

STAT
MEMORANDUM FOR: The Director
The Deputy Director
FROM: John L. Helgerson
Director of Congressional Affairs
STAT
SUBJECT: Weekly Report

Statutory Inspector General Legislation: As you know, the Senate Intelligence Committee hearing has been rescheduled for 26 February. Apparently at Senator Spector's insistence, the session will be open. The only other witnesses currently slated to appear are the Inspectors General for the State and Defense Departments. Both of these offices were established by statute a few years ago.

Government Accounting Office Legislation: It is likely that Senator Glenn will soon attempt to attach his legislation authorizing GAO audits of the Agency as an amendment to another bill being considered on the Senate floor. A probable vehicle for this amendment is the Boren-Cohen oversight legislation, which is due to be considered by the full Senate in the next few weeks. Glenn's original bill remains locked up in the Senate Intelligence Committee where it had been sequentially referred. There is no comparable provision in the Stokes oversight bill, although Representative Panetta several months ago introduced separate legislation along the lines of the Glenn bill that thus far has shown little movement.

Senate Polygraph Bill: The Senate Labor and Human Resources Committee voted this week to favorably report to the full Senate legislation to ban preemployment use of the polygraph in the private sector and circumscribe its use otherwise. Various governmental exemptions, including those for the Agency, remain in the bill. With several determined Senate proponents and opponents and no clear Administration position at this time, the timing and results of Senate floor action remain uncertain.

WEEKLY REPORT FOR THE DCI

OFFICE OF THE COMPTROLLER

WEEK ENDING 5 FEBRUARY 1987

1988

- The Directorates submitted to the Comptroller their decisions on cuts to the FY 1988 budget. The program adjustments will impact a range of Agency resources, including several major investment programs.

25X1

1989

- The Agency Executive Committee meets on 5 February to assess the cross-directorate impacts and congressional and Community implications of the various Directorate decisions on how to take cuts to the FY 1989 program.

25X1

- The Comptroller is working with the staffs of the House and Senate Intelligence Committees to decide on an appropriate set of "interim materials" outlining the FY 1989 budget prior to formal presentation to the Committees. The budget deficit reduction negotiations late last year seriously delayed preparation of our budget, and the Committees need at least preliminary materials before they begin hearings on the Agency's FY 1989 program later this month.

DCI Weekly Report

Office of the Inspector General

In response to a request from the Senate Select Committee on Intelligence, I have initiated an inspection of policies and practices within the Agency with respect to the acquisition of computers. The principal issue raised by the SSCI concerns the relative cost of purchasing large computers versus leasing. One purpose of the inspection is to provide information that will be useful in discussions of the Agency's FY 1989 budget.
